PROFESSIONAL SUMMARY

Committed IT engineer with 4+ years of experience in IT Support field, mainly in Middleware and virtual servers (servers on premise and on cloud). Ambitiously aided individuals by handling Java EE Application Servers or Web Servers. Diligently assisted with automation by scripting (bash) creation in order to make work easier. Excellent at collaborating with a team on critical projects and troubleshooting analytics. Strong background in Windows, Linux and UNIX environment working with enterprise ITIL processes, knowledge in java language, C, HTML, XML, and Python among others. It's easy for me to adapt to new environments, teams and projects. My passion is everything related to the IT field and the satisfaction of solve complex problems.
